Hammad Ali

Lahore, Pakistan | +92 304 9430705 | hammadmunawer2004@gmail.com | GitHub

SUMMARY

Software Engineer with **4+ years of experience** building intelligent, scalable, and production-ready web applications. Specialized in full-stack development, RESTful API design, multi-tenant SaaS architecture, and AI integrations using OpenAI API. Proven track record delivering AI-powered web platforms, pharmaceutical SaaS systems, e-commerce solutions, and HR management systems for startups and enterprises. Strong command over Node.js, React, Laravel, and .NET ecosystems with expertise in multi-tenant architecture, RBAC, and scalable database design.

EDUCATION

Superior University **2022 – 2026**
Bachelor of Science in Computer Science (BSCS) – CGPA: 3.26/4.00 *Lahore, Pakistan*

KIPS College **2020 – 2022**
F.Sc. Pre-Engineering – 75.27% *Lahore, Pakistan*

EXPERIENCE

Techzo Ltd. **Jan 2025 – Present (2 Years)**
Software Engineer *Lahore, Pakistan*

- Developed **Get Shopin**, a multi-tenant e-commerce platform with Vue.js frontend and separate MongoDB databases per tenant for full data isolation, featuring dynamic product catalog, order management, and per-tenant user systems. *[Live]*
- Built **Kingdom Rides**, a UK-based coach, minibus, and van hire platform using Laravel and MySQL with instant quote booking, pickup/drop-off management, and fleet management across England. *[Live]*
- Developed **Trounce**, an AI-powered SaaS platform integrating Facebook, Instagram, Twitter, and LinkedIn into a unified dashboard with intelligent analytics, AI-driven content suggestions, and subscription management.
- Designed and implemented **RESTful APIs** following scalable architecture patterns (MVC, Repository Pattern, Layered Architecture) for multiple client projects.
- Collaborated in **Agile environments**, participating in sprint planning, code reviews, and delivering features on schedule.

HuboWeb Technology (Pvt.) Ltd. [huboweb.com] **Jan 2023 – Dec 2024 (2 Years)**
Software Engineer *Lahore, Pakistan*

- Developed **CVAI** – a production-grade AI candidate validation system with multi-stage AI pipeline orchestration using BullMQ, Redis, and PostgreSQL, integrated with AIML services, encrypted file storage, and a React dashboard for live monitoring and CSV export.
- Built **CoreMax Cloud**, a multi-tenant pharmaceutical SaaS platform with subdomain-based tenant isolation, cross-timezone doctor-patient scheduling, role-based access control for Patients, Doctors & Admins, and subscription-based plan management.
- Developed **HRMS** backend using ASP.NET Core and Dapper with layered architecture – managing employee records, attendance, payroll processing, leave management, and RBAC for HR admins and employees.
- Integrated **OpenAI API** and custom AI chatbot solutions into multiple client web applications, automating workflows and improving user engagement.
- Implemented secure **JWT-based authentication**, OAuth 2.0, and role-based access control across multiple enterprise-grade projects.
- Optimized MySQL and PostgreSQL database queries through indexing, improving API response times by approximately **30%**.

PROJECTS

CVAI – AI Candidate Validation System [Live] *React, Node.js, BullMQ, Redis, PostgreSQL, OpenAI API*

- Production-grade multi-stage AI pipeline orchestration for candidate validation with encrypted file storage and live React monitoring dashboard with CSV export.

CoreMax Cloud – Pharmaceutical SaaS Platform [Live] *React.js, Node.js, PostgreSQL, Multi-tenant, RBAC, JWT*

- Multi-tenant pharmaceutical platform with subdomain-based isolation, cross-timezone doctor-patient scheduling, and subscription-based feature management.

Get Shopin – Multi-Tenant E-Commerce [Live] *Vue.js, Node.js, MongoDB, Multi-tenant Architecture*

- Full e-commerce solution with per-tenant database isolation, dynamic store management, product catalog, and order management systems.

Kingdom Rides – Coach & Van Hire [Live] *Laravel, PHP, MySQL*

- UK-based vehicle hire platform with instant quote booking, pickup/drop-off management, and fleet management across England.

Trounce – AI Social Media Management System *Node.js, Express.js, MongoDB, OpenAI API*

- SaaS platform integrating Facebook, Instagram, LinkedIn, and X (Twitter) into a unified dashboard with AI-powered content generation, team workspaces, and subscription management.

HRMS – Human Resource Management System *React, ASP.NET Core, C#, Dapper, SQL Server*

- Full-featured HR system with layered architecture managing employee records, attendance, payroll, leave management, and role-based access for Admins, Managers, and Employees.

SKILLS

Programming Languages	JavaScript (ES6+), TypeScript, C#, Python, PHP, SQL, C++
Frontend	React.js, Vue.js, Next.js, Redux Toolkit
Backend	Node.js, Express.js, Laravel, Flask, ASP.NET Core, Dapper
Databases	MySQL, MongoDB, PostgreSQL, SQL Server, Redis, Firebase
AI & Integrations	OpenAI API, AI Pipeline Orchestration, BullMQ, Stripe, PayPal, OAuth 2.0
Architecture	Multi-tenant SaaS, RBAC, MVC, Repository Pattern, Layered Architecture, MERN Stack
Tools & Platforms	Git, GitHub, Docker, Postman, Linux, VS Code, Visual Studio, Agile / SDLC
